Information about our SIMs

Combine hardware and SIMs

Our SIMs can be purchased with or without our hardware. In case you only buy a SIM solution without the hardware, the rate is a bit higher. We therefore always recommend combining your SIM with our hardware solutions to be eligible for the combi-deal.

Our SIMs perform better with our hardware thanks to our unique setup and configuration and our cost control and management tools. Which is why we strongly recommend our hardware and SIMs combination : "The AE Total Solution".

Contract and other costs

All our SIMs have a minimum contract duration of three months. After these first three months, our SIM contracts can be cancelled with a notice period of one calendar month. We charge one-off payment of € 50,00 per order for administration, activation, and delivery costs. After the mentioned bundle you pay the amount of € 2,50 per GB and we can also block that option.
